

How to use diecutting lines

Diecut line:

name: CutContour
Color: 100% Magenta, spotcolor
Attributes: Always set line to overprint

Foldline:

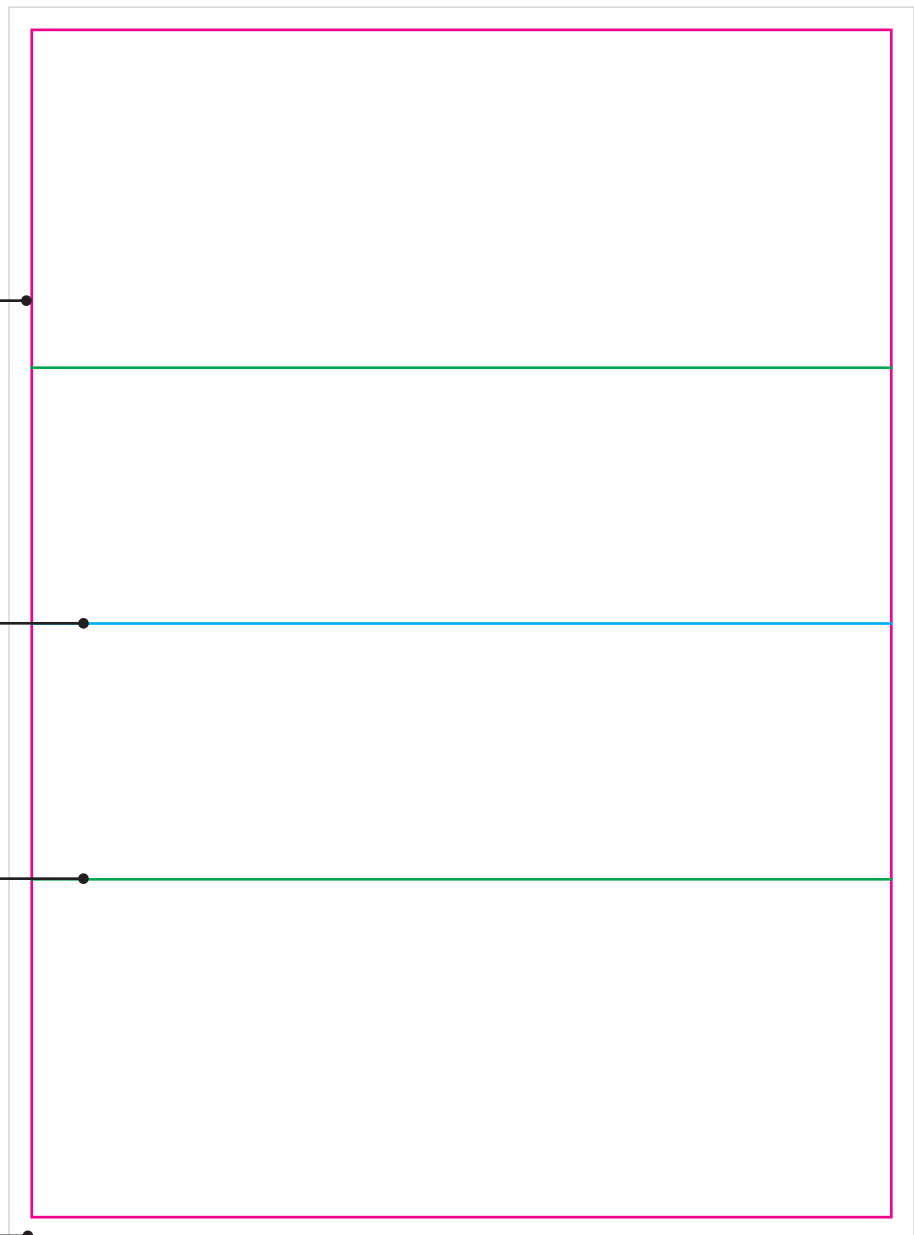

name: Fold or Crease
Color: 100% Cyan, spotcolor
Attributes: Always set line to overprint

Perforation:

name: Perforation
Color: 100% Green, Spotcolor
Attributes: Always set line to overprint

Bleed:

Always use 3mm bleed in your document.

NOTE!

NEVER put instructions, notes or sizes on the printfiles: always use a separate file for technical briefing. The filecreator is always responsible for the technical format and design of printfiles.
